

DN-7 Nozzle

DN-7 CAF NOZZLE

Directional Nozzle DN-7

Crafted for the application of compressed air foam the DN-7 pendent nozzle will deliver a broad coverage of CAF to the hazard area.

This nozzle is designed to be used in the pendent position and is only approved for use with ACAF Systems. The performance of the nozzle is pre-engineered with designs established in the ACF System design manual.

Maximum Height

49 feet Hydrocarbon
40 feet Polar Solvent

Minimum Height

6 Feet

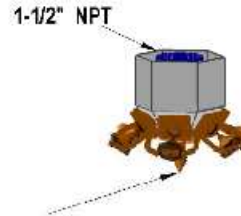

Maximum Spacing

14' x 14' Hydrocarbon
10' x 10' Polar Solvent

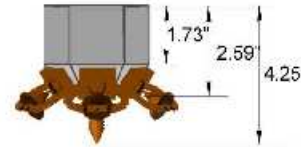

(6) Open Spray Nozzles
1/2 " NPT
K 5.6
